Quote: 'We look forward to building a long and productive relationship with City West Water' - David Middleton, Business Development Manager PARASYN Melbourne.

In late September PARASYN attained 'Approved Systems Integrator' Status with City West Water in Melbourne. This enables PARASYN to undertake SCADA project work on behalf of City West Water, one of three retail water businesses owned by the Victorian Government in the Melbourne metropolitan area. City West Water provides services to over 300,000 residential, industrial and commercial customers in Melbourne's Central Business District and inner and western suburbs. The award of 'Approved Systems Integrator' status follows PARASYN's successful completion of training on City West Water's existing SCADA system. David Middleton, Business Development Manager in PARASYN's Melbourne office, was delighted with the news adding 'Like PARASYN, City West Water is a quality organisation who we have been keen to do business with for some time. We look forward to building a long and productive relationship with City West Water'.
