

PARASYN SPONSOR WIOA CONFERENCE

Date Published: 10/09/2008

PARASYN Attend 71st Victorian Engineers & Operators Conference

After a huge year in water and waste water this year PARASYN attended the 71st Victorian Engineers & Operators Conference organized by the WIOA. Historic Bendigo came alive as hundreds of water and waste water operators and engineers descended on the city. The conference was held on the 3rd & 4th of September.

With so many key projects undertaken in the area in recent times it was a great opportunity to meet many of our clients and showcase the leading edge systems that are being implemented on their behalf. The conference was PARASYN's first involvement with the WIOA and a relationship that we look forward to continuing into the future.
