

PARASYN

PANELS ON THE SAME WAVELENGTH AS YOUR SYSTEM REQUIREMENTS

PROCESS MEASUREMENT & CONTROL PANELS

YOUR INDUSTRY

Panels built by experienced Engineers and Technicians who understand information & control systems across various industries.

YOUR PARTS

We support your choice of technology and parts or we can assist with product selection.

YOUR DESIGN

If you have an existing design and system then your Panel can be built by us to your specifications and unique requirements. All cables will be labeled to your existing standards or we can help develop a new set of requirements.

CONSULTED DESIGN

Your Panel can be tailored to support specific needs. Engineers and Technicians are on hand to provide design advice on the best fit. Detailed drawings can be produced so that any Technician can install and maintain your panel.

YOUR SATISFACTION

You save time and money with a robust Panel designed to reduce ongoing costs through repeatable manufacture. Consulted Design

"Parasyn is able to deliver quality Panels that are highly consistent with our standards"

OPTIONAL INCLUSIONS:

DETAILED DESIGN

Electrical Diagrams, Components lists and other support documentation can all be developed or supplied.

INSTALLATION

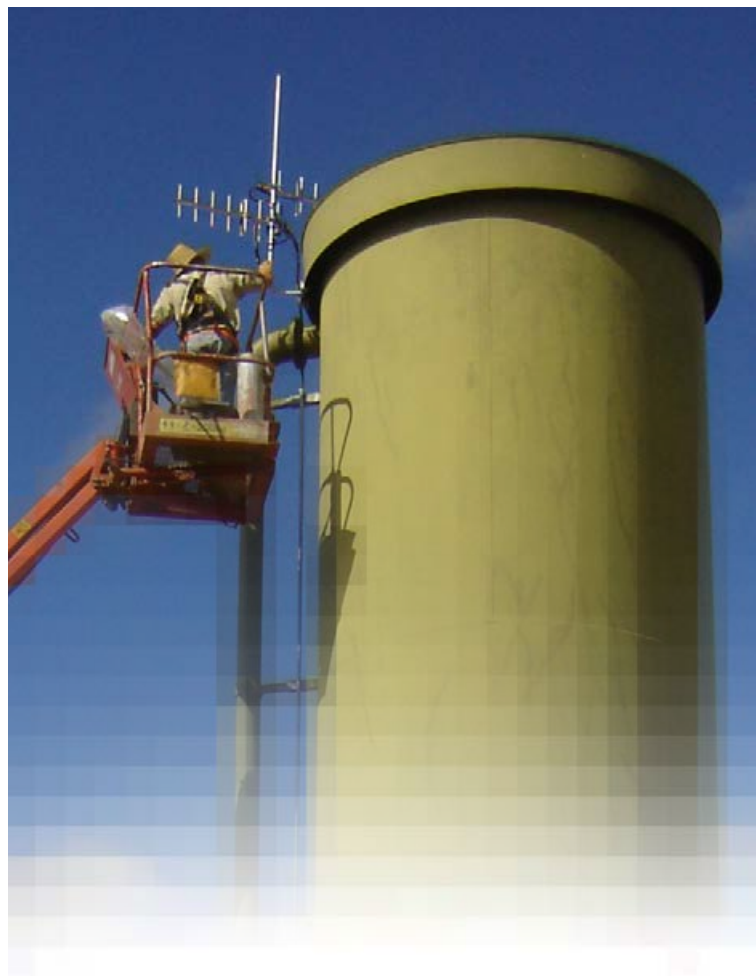

If you don't have the contacts or time our skilled Technicians can install your Panel and ensure it runs to operational standards.

LOCAL SUPPORT

Whether you are installing one Panel or rolling out a whole system with many Panels, we can oversee or train the installation people, or work with your preferred contractors to ensure project competence.

HARDWARE COMPONENTS

Panels can be built with free issue components or fully supplied from reputable suppliers. Supply guarantees are monitored frequently to make sure you always have confidence in the supply expectations.
